What's New ?

- 1. NEW IRIS.** In addition to increasing our ample listing of iris by adding several of the newest and finest varieties, we are, for the first time, introducing iris from the gardens of two of New England's well-known iris hybridizers. The superb new blue iris **BLUE STEEL** and **LAKE WALDEN** from Mrs. Leola Fraim of Waltham are offered to the American gardening public for the first time, and we are proud to be co-introducers of the greatly sought-after new varieties **GUSSIE**, **SUGAR PLUM**, **TRELAWNY** and **ANTHEA** from Mrs. Preston Corey of Reading, Mass. For further information see page 24.
- 2. NEW DAFFODILS.** Our listing of new and rare daffodils has been increased greatly in quantity and quality by the addition of **ADA FINCH**, **CAIRHAYS**, **EGO FLOS**, **ERIE**, **FEBRUARY SILVER**, **FIREBIRD**, **FRIGID**, **FANCHEON**, **GOLD COURT**, **HUNTER'S MOON**, **HAWERA**, **KING'S COURT**, **MOONRISE**, **RED MARLEY**, **ROSSLARE**, **RAPALLO**, **SILVER CHIMES**, **SPELLBINDER**, **TORTOSA**, **WALT DISNEY**, **WATIERI**, **WINALL**, and **ZERO**. All have been carefully tested and found to be "tops" in their respective classifications.

Few gardeners are aware that **RED EMPEROR** (probably the most popular tulip in the world) has several wonderful close relatives, like it in flowering early, and huge flowers in many different colors. Some that will make the neighbors' eyes pop with envy are: **ALBAS**, **CANTATA**, **DEFIANCE**, **FEU SUPERBE**, **GRAND PRIX**, **HOLLAND'S GLORY**, **RED RIBAND**, **SIR DANIEL**, **TORCH-LIGHT**, and the superb new white, **PURISSIMA**. We list **AMB**, **WARREN AUSTIN**, **LILAC QUEEN**, **MAY BLOSSOM**, **PALETTE**, **ROYALTY**, and **TORCH**, many for the first time. See page 21 for complete descriptions.
- 6. NEW AND WONDERFUL LILIES.** We first offered some of the magnificent "MID-CENTURY LILIES" in 1950 when the gardening public got their preview of a new race of lilies that are hardy, easily grown, and disease resistant. Superb varieties like **CAMPFIRE**, **ENCHANTMENT**, **FIREFLAME**, **GOLDRUSH**, **JOAN EVANS**, **PARADE**, and **VALENCIA**, should be in every garden. Other exceptionally fine lilies are **WHITE ELF**, **THE PINK CENTIFOLIUMS**, **DR. ABEL**, and **ROSEANNA McCOY**.
- 7. NEW NAMED AMARYLLIS.** For years we have tested the new hybrid Amaryllis from many sources raising them from seed and bulbs. Finally, we are convinced that the super strain from **Ludwig of Holland** is one of the finest in horticulture. We were overwhelmed by the size, vigor and clearness of color of these amazing hybrids. Some threw three spikes from a single bulb with four flowers to the stalk. For the first time we are listing Amaryllis and feel we are starting at the top. You will be astounded by these incredible new-named varieties. See page 27.

NEW PINK DAFFODILS

NOTICE—There is no such thing as a pure pink daffodil. All the new daffodils that are called "pink" and have created such a sensation have white or very pale perianths and cups of varying shades of pink, rose, apricot, and salmon. Many of these flowers do not show the full pink tones until the flower has been open for several days. The following are considered the finest available today.

WARNING—Plant "Pink Daffodils" in semi-shade or protect the flowers when in bloom from hot sun. The true, beautiful shades of pink are retained by these methods.

CLASSIFICATION—Most "pink daffodils" are classified under Division 2b.

HARDY LILIES

New Mid-Century Lily Hybrids

These lilies mark a new era in culture and variety. The following varieties offered have been selected, not only for their beauty, but for their great vigor and endurance under adverse conditions. They are hybrids of *L. tigrinum* and *L. umbellatum*. They grow as well or better than either parent. They are as colorful and spectacular as any lilies grown

and are very easy to increase. One of them, "Enchantment," has been patented and may not be propagated commercially except by special license. A major and sensational advance has been achieved in the production of these hybrids. All of these lilies show bulbils in the axils of the leaves, if the flower or buds are removed early in the season. Enchantment will produce bulbils even if allowed to flower normally. All of them flower in July. Their blazing colors and their straight, stiff stems have made them stand out in

their home garden. Their radical departure in form, habit and coloring have been noticed by every visitor. Be the first in your neighborhood to enjoy these exciting new lilies.
